

ATTACHMENT 2

22. (Amended) The pharmaceutical formulation as defined in Claim 21 wherein the ionic polymer comprises sodium alginate, carbomer, calcium carboxymethylcellulose or sodium carboxymethylcellulose, and the non-ionic polymer comprises hydroxypropylmethylcellulose [2910] 2208 USP, viscosity grade ranging from about 4000 to about 100,000 cps and/or hydroxypropylmethyl cellulose [2208] 2910 USP viscosity grade ranging from about 3 to about 150 cps.

56. (Amended) The pharmaceutical formulation as defined in Claim 55 wherein the ionic polymer comprises sodium alginate, carbomer, calcium carboxymethylcellulose or sodium carboxymethylcellulose, and the non-ionic polymer comprises hydroxypropylmethylcellulose [2910] 2208 USP, viscosity grade ranging from about 4000 to about 100,000 cps and/or hydroxypropylmethyl cellulose [2208] 2910 USP viscosity grade ranging from about 3 to about 150 cps.
